The World Doctors Orchestra in Numbers

The World Doctors Orchestra is a growing institution; it currently consists of 1.666 musicians from the domain of medicine: 879 women and 785 men from 55 countries. They are medical professionals and, at the same time, enthusiastic and active musicians, many with a professional musical background. About 100 musicians participate in each concert, depending on their availability and on the instruments needed for the selected repertoire.

Remarkably, many of the musicians are proficient in two or more instruments. Also, many have had professional music training and experience; the others are excellent amateur musicians who engage in regular musical activity.

A great variety of medical specialties is represented. Internists, pediatricians and general practitioners take the lead, and there is a wide variety of specialization in diagnostic and therapeutic areas, as well as in pharmacology and research.
